

INAUT 

Your reliable partner  
for automation solutions in  
environmental technology and industrial plants.

## INAUT

We at INAUT are experts in automation. We implement very specific technical solutions with a focus on environmental technology and industrial plants.

Comprehensive consulting, planning, and start-up services as well as sustainable maintenance of our customers' installations complement our range of products. INAUT Automation GmbH is an owner-managed company based in Lower Austria. It was established in 2001 and operates worldwide. To serve the market in the Far East, INAUT has also set up a subsidiary in China.

INAUT's Managing Director Martin Liehl and his team combine many years of experience with great expertise.

*"It's good to have visions.  
Making them come true is even better."*

Lisz Hirn, Austrian philosopher and artist

fair. competent. reliable.

### Vision

We develop novel solutions to automate environmental technology. When it comes to automating environmental facilities, think INAUT.

### fair

Our customers are our partners. We cooperate closely with them to develop solutions tailored to their specific requirements. We believe in honest and open communication and in a fair price/performance ratio. With our irresistible overall package we contribute to our customers' success. And we treat our suppliers in the same way: open, honest and fair.

### competent

We are experts in E&C technology and engineering. We implement state-of-the-art automation processes using either third-party equipment or our own products. Together with our partners in the plant engineering sector we develop economical solutions for environmental facilities.

### reliable

We are in constant communication with our customers throughout a project. Project handling is straight-forward and efficient, and our customers and partners experience first-hand the commitment of our employees. We support and promote our employees through ongoing education and training.

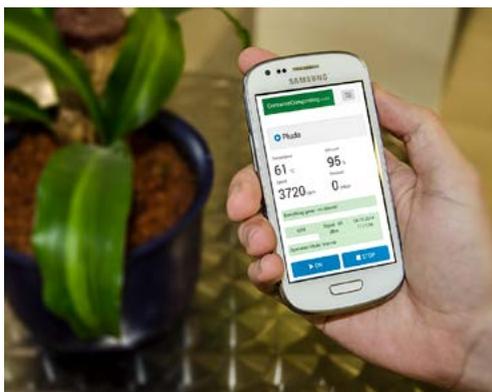

involution systems offer control of all information generated by your plants and ensure a high degree of availability through optimised control concepts and a sophisticated reporting system. involution is designed to make optimum use of your resources and capital.

## Our Products

cloud automation brings automation solutions to mobile and fixed applications. It is the perfect solution for small and inexpensive facilities. The system operates locally and can be controlled via an internet browser from a computer or any other mobile device.

A vast number of functions makes this system extremely versatile. You're trying to take a measurement somewhere but can't get the wires to the measuring point? You think you're facing an impossible task? We'll solve it for you!

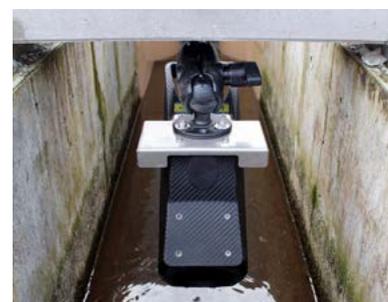

## Bürgerservice wasserstand.info

With floods becoming a more and more frequent phenomenon in recent years, it becomes obvious just how important early warning systems are in areas prone to flooding: not just for the emergency service organisations but also for the general public who above all require reliable information.

The RAVEN-EYE® is Flow-Tronic's new contactless RADAR flow sensor for open channel measurement. It combines contactless superior measurement technology with straight-forward integration into existing process control engineering and data communication systems.

## Why INAUT

INAUT Automation GMBH is large enough to take on complex tasks but still small enough to look into your specific demands. No matter where in the world your project is – when it comes to E&C technology you may always count on INAUT. Perhaps this is what makes our regular customers so successful.

### Know-How

Our specialist know-how combined with continuous development results in products which are tailored to our customers' needs. Years of experience in the business guarantee successful project management all over the world.

### Commitment

Our committed and dedicated employees will always find the best solution for our customers.

### Service

Our service team is there for you to ensure sustainable maintenance of your plant. Safety is thus guaranteed, both in terms of operation and investment.

*"Working with experts in their field on a basis of mutual trust, respect and fairness, as well as fast, target-oriented and efficient work in nearly all countries on all continents have been the corner stones of our successful cooperation for more than 10 years."*

Aurel Lübke, CEO Compost Systems

**Our partners are among the most successful within their business.  
This makes us proud.**

INAUT is the official distributor and service partner for all Flow-Tronic products in Austria.

Relying on invitation for their water technology plants.

The expert in composting systems relies on sustainable support delivered by INAUT.
